

A-Zyme F1[®]

Researched and Developed by the National Center
for Genetic Engineering and Biotechnology (BIOTEC), Thailand

Registration No. 01 04 58 0437

High quality enzymes for animals

Produced by using Multi-enzyme preparation technique

- A-Zyme F1 is a complex NSP-ase enzyme includes Amylase & Phytase
- A-Zyme F1 is produced by non GMO fermentation of *Aspergillus niger* BCC 7178.
- Suitable for using in high-NSP feedstuffs such as corn, soybean meal, cassava, palm meal etc

Benefits of A-Zyme F1

- Reduce feces and nitrogen & phosphorus output
- Reduce bad smell caused by ammonia
- Reduce feed costs
- Reduce digestive disorders caused by fiber in feed
- Improve the digestibility of fiber in feed
- Improve utilization efficiency of NSP raw material feed
- Improve uniform pig growth
- Improve ADG, FCR and FCG

A-Zyme F1 Specifications :

Guarantee minimum of multi-enzyme activities per kilogram include ;

1. Beta-Glucanase	7,000,000	units
2. Xylanase	5,000,000	units
3. Cellulase	4,000,000	units
4. Pectinase	3,000,000	units
5. Amylase	3,000,000	units
6. Mannanase	1,000,000	units
7. Phytase	500,000	units

Recommended dosage : 500 g/ton feed

Package : 1 & 10 & 20 kg
