

Researched and Developed by the National Center for Genetic Engineering and Biotechnology (BIOTEC), Thailand

Registration No. 01 04 58 0440 High quality enzymes for animals Produced by using Multi-enzyme preparation technique

- A-Zyme F2 Plus P is a complex NSP-ase enzyme includes high concentrated of Amylase & Phytase
 - A-Zyme F2 Plus P is produced by non GMO fermentation of *Aspergillus niger* BCC 7178 and *Trichoderma reesei* by special technique
- Suitable for high-NSP feedstuffs such as corn, soybean meal, cassava, palm meal etc. Benefits of A-Zyme F2 Plus P

- Reduce feces and nitrogen & phosphorus output
- Reduce bad smell caused by ammonia
- Reduce feed costs
- Reduce digestive disorders caused by fiber in feed
- Improve the digestibility of fiber in feed
- Improve utilization efficiency of NSP raw material feed
- Improve uniform pig growth
- Improve ADG, FCR and FCG

A-Zyme F2 Plus P Specifications:

Guarantee minimum of multi-enzyme activities per kilogram include;

1. Phytase	1,000,000	units
2. Amylase	5,000,000	units
3. Xylanase	3,500,000	units
4. Beta-Glucanase	2,000,000	units
5. Cellulase	1,500,000	units
6. Pectinase	1,000,000	units
7. Mannanase	900,000	units

Recommended dosage: 500 g/ton feed

Package: 1 & 10 & 20 kg
